

Resin Bound Colour Range

Resin Bound Decorative Stone Surfacing is mixed onsite with kiln dried aggregates and binder.

Here are some examples of the colour's we offer that can be installed for the resin bound surfaces which is very popular for pathways, roads, footpaths, driveways, tree pit surrounds and patios.

It needs to be made aware that these samples are a true representative however no guarantee can be given to an exact match because all aggregates are naturally occurring and, as such, are subject to some variation in appearance.

Our Advice is free and we will be only too happy to talk you through the various options for your resin bound stone surfacing scheme.

Autumn Gold 1-3mm
